

BILL TRUONG

Unity Engineer · Games, XR & Tools

Ho Chi Minh City, Vietnam

billtruong003@gmail.com | linkedin.com/in/billtruong003 | github.com/billtruong003 | billthedev.com

SUMMARY

Unity engineer and generalist. I make games, and when a game needs a shader, an editor tool, a server or a web page, I build that too. I like trying things other people skip: I started a VR gameplay channel that now has 2.5M+ views, sell a Blender add-on on Superhive, and open-sourced a Gemini API proxy that has 38 stars on GitHub. At studios I worked on Applaydu (50M+ downloads) and Shmackle (Meta Quest, 4.7 stars from 23K+ ratings). I work a lot, mostly because I enjoy it.

EXPERIENCE

GEM Corporation

Senior Software Engineer

Seoul, South Korea

Jul 2026 - Present

- Designing the architecture of a live data synchronization system for the client's platform.
- Working directly with the client's engineering team.

CurlyBlue

Technical Artist (promoted from Unity XR Developer)

Ho Chi Minh City, Vietnam

Apr 2025 - Jul 2026

- Rebuilt Shmackle's visuals with toon, outline and dissolve shaders (HLSL, Shader Graph).
- Held the 72 FPS baseline on Quest 2 and reached 80 to 90 FPS on Quest 3 through draw-call reduction, GPU instancing and texture atlasing.
- Built the Shmackle Pad, the in-game tablet for customization, social features and the store.
- Worked on the Shooting Range update with Photon Fusion and added a dynamic FOV option against motion sickness.
- On Teabag, owned the cel-shading pipeline, XR dynamic resolution and the modular wardrobe system.

Skills: Unity, C#, HLSL, URP, Photon Fusion, PlayFab, Meta Quest

FPT IS (akaVerse)

Unity Developer

Ho Chi Minh City, Vietnam

May 2024 - Apr 2025

- Wrote a scan cleanup and batch tool for a heritage project with 30,000+ artifacts; artists went from one scan at a time to 10 to 20 per batch.
- Worked on real-time data sync and VR controls for an NVIDIA Omniverse digital twin, shown by FPT Japan at NVIDIA AI Summit Tokyo 2024.
- Built a configurable 3D bin-packing system for truck and container loading (DENSO logistics).
- Worked on gameplay, UI, shaders and performance for Animal Push Royale (Top 6, Vietnam GameVerse 2024).

Skills: Unity, C#, Python, NVIDIA Omniverse, Blender, VR

Golden Sea Studio

Unity Developer

Ho Chi Minh City, Vietnam

Jan 2024 - Mar 2024

- Took Merge Fruit (Suika-style) from prototype to release.
- Integrated ad and analytics SDKs and kept build sizes small.

Skills: Unity, C#, Mobile

Gameloft Vietnam

Game Developer

Ho Chi Minh City, Vietnam

Jun 2023 - Dec 2023

- Wrote gameplay for the Treasure Toss and Animalody modules.
- Worked in Scrum with code review and QA against the licensor's standards.

Skills: Unity, C#, Scrum, Jira, GitLab

GAMES

Zombie War | solo, playable in the browser

Unity 6, URP, WebGL

Top-down zombie survival shooter with campaign waves and bosses: 25 weapons, a 978-part modular costume system, and NavMesh hordes drawn with vertex animation textures and pooling.

Addressables, Animation Rigging weapon IK, VFX Graph and Burst, built on my own BillGameCore framework.

Timeless Soul | Unity 20th Anniversary Game Jam

Unity 6, URP, WebGL

Roguelite horde shooter where every death leaves a Soul Grave that shapes the next life; VAT enemies, occlusion baking and kaiju bosses, built within the jam.

VR and multiplayer prototypes | personal

Unity 6

TOSSZONE: multiplayer VR with Photon Fusion, Meta XR SDK and XR Interaction Toolkit. Dungeon Game: VR dungeon crawler with OpenXR and XR Hands.

Duel Radiant Arena: online duels on a Colyseus server. A 2D multiplayer game on SpacetimeDB with Spine characters.

AI simulations for YouTube <i>Content War, Square Race</i>	Unity 6, AI Navigation
100 NavMesh AI agents fighting in a procedural battle royale arena with a shrinking zone, plus racing simulations, recorded as channel footage.	
Drag & Slice: Culinary Journey <i>Korea Game Week contest, team entry</i>	Unity, Firebase
Drag-to-shoot action with a cooking loop, released on itch.io and playable on the web.	
Game Lab and Dev Lab <i>billthudev.com</i>	10 WebGL games, 2 series
Ten playable WebGL builds on my site, and build-along Unity 6 series (a 12-lesson shoot 'em up in English and Vietnamese, and a pixel-art platformer) that each end in a playable build.	

OPEN SOURCE & TOOLS

BillGameCore <i>Unity framework</i>	C#
My reusable Unity framework (services, tweening, shared systems), used across six of my Unity 6 projects.	
Git Profile Awaken <i>open source, 6 stars</i>	TypeScript, Vercel
Turns any GitHub profile into an RPG-style status card built from the user's activity.	
Pro Origin Tools <i>paid Blender add-on on Superhive</i>	Python, bpy
Sets object origins for whole selections: finds separate mesh islands, adds a one-click hinge for doors and lids, and runs in batch or from scripts.	
Unity and Blender tools <i>open source</i>	C#, Python, bpy
Scene Switcher (Unity editor), Pro Atlas Baker (Blender atlasing and UV packing), Responsive WebGL Template (Unity WebGL that fits any screen).	
Bill SSOutline and Bill Biome Shader <i>open source</i>	Render Graph, compute shaders
Screen-space outline on URP Render Graph with depth, normal and color edges plus occlusion and selection masks; stylized biome with compute-shader GPU instancing, interactive foliage and a painting tool.	
KeyStream-Gemini <i>open source, 38 stars and 15 forks</i>	JavaScript
Reverse proxy with an OpenAI-compatible endpoint that rotates across Gemini API keys, so requests keep going when one key hits its rate limit.	
Lucy <i>personal AI agent</i>	Claude Agent SDK, Node.js, SQLite
Runs 24/7 on a small VPS over Telegram, with long-term memory (full-text and vector search), MCP tools and a guard against dangerous commands.	
More tools <i>open source</i>	Python, TypeScript
Wavewright (local AI sound effects for games), a Discord bot with an LLM router, a Whisper subtitle pipeline.	

TEACHING & COMMUNITY

YouTube , <i>Bill VR Gamer, Bill The Dev, Bill AI Trainer</i>	2023 - Present
2.5M+ views and 1.5K+ subscribers on VR gameplay, plus Unity devlogs and AI simulation videos.	
FullHouseDev , <i>Game Development Instructor, part-time</i>	Sep 2024 - Jul 2026
Taught Unity and game development through hands-on projects and reviewed student code.	
Marathon Education , <i>CS Education Counselor, part-time</i>	Mar 2023 - Jun 2026
Helped students learning computer science choose a path and work through problems.	
DigiUni Vietnam , <i>IT Teacher, part-time</i>	Jul 2022 - Jun 2024
Started as a teaching assistant, then taught programming, game development and 3D basics.	

EDUCATION

FPT University , <i>Software Engineering</i>	Since 2022
30% Talent Scholarship	
EMASI Van Phuc International School , <i>High School Diploma (Honors)</i>	2019 - 2022
GPA 9.2/10	

SKILLS, AWARDS & LANGUAGES

Game development: C#, Unity 6 and 2022 LTS, URP, Addressables, Input System, Cinemachine, AI Navigation, Animation Rigging, Burst, Spine, DOTween, Odin, Unity Ads, IAP and Analytics	
Graphics: HLSL, Shader Graph, VFX Graph, URP Render Graph, compute shaders, GPU instancing, vertex animation textures, profiling and optimization on Quest and mobile	
XR and networking: Meta XR SDK, XR Interaction Toolkit, OpenXR, XR Hands, Photon Fusion, Colyseus, SpacetimeDB, PlayFab, Firebase, NVIDIA Omniverse	
Tools, web and AI: Python, Blender Python API, TypeScript, Next.js, React, Astro, Node.js, SQLite, GitHub Actions, Claude Agent SDK, MCP, Gemini API	
Awards: Top 6, Vietnam GameVerse 2024 (Animal Push Royale); selected by FPT IS for developer training led by Apple engineers	
Languages: English (IELTS 6.0), Vietnamese (native)
